

DANISH STATE RAILWAYS

0.4.0. Well Tank

Class Hs.

Nr. 385.

Having almost completed the restoration of North Eastern Railway 0-4-0 T Class Y7. Steam Power Trust 65 now intend to preserve another small 0-4-0 locomotive D.S.B. No. 385. This is a typical continental locomotive which would make a facinating mate for 1310. It is possibly the last such locomotive available this side of the iron curtain.

Steam Power Trust 65 has appreciated the support of railway enthusiasts in their original project and invite your help in this venture. An option to purchase this locomotive has been noegotiated with the D.S.B. and it is hoped to bring it to England for display and occasional steaming.

Much interest has already been expressed in this project and your help financial and otherwise would be appreciated by the Trustees.

Every endeavour shall be made to keep you informed of developments through the Railway press.

Trustees, Steam Power Trust 65.

September, 1970.

Form of donation:

To Tresurer of Steam Power Trust 65
K. H. COCKERILL
30, Hartburn Lane,
Stockton-on-Tees,
England,
TS18 3QH.

Please receive _____ to be applied to the purchase, transport and restoration of D.S.B. 385.
